Gary – As requested, and to follow up on our meeting in Dallas on Wednesday, February 3rd, the attached tables (in the Excel file) provide dioxin and furan data for the seven samples collected from the armored cap at San Jacinto in December 2015. I've also attached the maps and fingerprint evaluation figures of those sample results that were discussed in the meeting. As previously discussed, we expect to have a full report to you on the sampling and analysis next Friday, February 12, 2016.

Please don't hesitate to contact me if you want to discuss anything.

Regards,
David
